## Functional Description

The 'LS273 is an 8-bit parallel register with a common Clock and common Master Reset. When the  $\overline{MR}$  input is LOW, the Q outputs are LOW, independent of the other inputs. Information meeting the setup and hold time requirements of the D inputs is transferred to the Q outputs on the LOW-to-HIGH transition of the clock input.

L	X	X	L
H		H	H
H		L	L

H = HIGH Voltage Level  
L = LOW Voltage Level  
X = Immaterial
